

Global Centre of Packaging Excellence

Game-changing
packaging solutions

Digitising the Supply Chain

Global Centre of Packaging Excellence game-changing packaging solutions

Faller Perigord is proud to announce the establishment of a Global Centre of Packaging Excellence, to support our clients and the greater Life Science community across Europe.

This Centre delivers new levels of **speed to market**, efficiency and **innovation** for our partners, by bringing together an unparalleled level of packaging expertise and experience from our two companies.

Solutions for every stage of the packaging supply chain

Our multidisciplinary subject matter experts collaborate **as one team, under one roof** – sharing best practice, and developing innovative packaging solutions that keep pace with our industry’s ever-changing regulatory environment.

This enables us to deliver best-in-class packaging and labelling services across **every stage of the supply chain**: creative and digital services, strategic consultancy and managed services, packaging and labelling services, artwork management software solutions and strategic outsourcing.

Our integrated team works between these disciplines to **connect the dots for our partners** and **develop game-changing solutions** for a highly regulated industry – all underwritten by quality and compliance, within a validated GMP Life Science environment.

A shared vision of excellence

It is because of our shared commitment to **innovation, quality** and **compliance** that Faller and Perigord have embarked upon this joint venture; these traits form the DNA of both companies, and they are at the core of everything we do.

Our new Global Centre of Packaging Excellence is the manifestation of this shared vision.

Whether you’re a large Life Science company or a small start-up, Faller Perigord has the expertise, knowledge and experience – all housed together in one location – to build a multidisciplinary team that will take on your challenges and deliver success.
