Cooperation on sustainable packaging solutions

Faller Packaging is cooperating with Syntegon, an expert in packaging technology and process engineering

Faller Packaging, a leading supplier of secondary packaging for the healthcare and pharmaceutical industries, has entered into a cooperation agreement with Syntegon, a specialist in packaging technology and process engineering. The two companies intend to harness synergy effects and combine their expertise in sustainable packaging solutions.

Faller, which is based in Waldkirch, Germany, is already familiar with its new partner. Syntegon, formerly called Bosch Packaging Technology, worked with it to develop the Eco Save Pack, a sustainable packaging solution for fragile products. This is a carton tray with inlays that can be adapted to the given contents. All of the package components are made of environmentally friendly cardboard. The inlays have a chambered design, allowing them to accommodate products like syringes, vials and ampoules. In this way they ensure optimal protection during storage and transport.

The two companies are continuing to develop new ideas for sustainable packaging. Demand in the pharmaceutical industry for recyclable packages made of a single material is steadily increasing – and for good reason: manufacturers benefit from having a smaller ecological footprint and they cut costs by reducing the number of process steps in production. Sustainability is a topic that is becoming increasingly important in the pharmaceutical industry.

Combined expertise in machinery and packaging

By resuming their cooperation, the companies will be able to combine their expertise and augment one another. Faller Packaging, which specialises in secondary packaging, develops and manufactures folding cartons, labels, package leaflets and combination products. Syntegon is a leading provider of packaging technology and an expert in process engineering for the food and pharmaceutical industries. Besides offering technical know-how, the company sells packaging machinery. "Sustainable packaging is currently an important topic for us and our customers," says Dr. Daniel Keesman, Managing Partner of Faller Packaging. "Together with Syntegon we want to use resources responsibly, reduce the world's increasing quantities of packaging waste and at the same time offer pharmaceutical manufacturers ways to cut costs in production."

For those who would like to see how this works in practice, Syntegon will be offering a webcast with the title "Shape the future of pharma packaging with Eco Save Pack." Scheduled for 10 December, the webcast will show the advantages and possibilities of cardboard-based packaging for pharmaceutical products. Participation in the event is free, and it will be held in English.

About Faller Packaging

For more than 30 years, Faller Packaging has specialised in tailor-made, full-range solutions for secondary packaging materials for the pharmaceutical industry. The company is a single-source supplier that develops and manufactures folding cartons, package inserts, labels and combination products and delivers both standard products and special solutions based on customers' wishes. Digitalised, optimally harmonised processes ensure maximum efficiency, sustainable production and fast, reliable delivery times. In addition, Faller offers customised logistics services and supply chain concepts. As a result, the company is an expert partner for everything relating to the procurement and packaging of pharmaceutical and healthcare products.

In addition to its headquarters in Waldkirch in the German state of Baden-Wuerttemberg, Faller Packaging also has sites in Binzen, Großbeeren and Schopfheim as well as in Hvidovre in Denmark, Łódź in Poland and Debrecen in Hungary. The Worms-based subsidiary PackEx, which was founded in 2018, specialises in the manufacture of folding cartons in small and very small batches. In collaboration with the Irish company Perigord Premedia Ltd., Faller

has set up a “Global Centre of Packaging Excellence” for artwork management, print consultancy and coordination. In total, August Faller GmbH & Co. KG has more than 1,300 employees.

About Syntegon Technology

Syntegon Technology is a leading global process and packaging technology provider. Formerly the packaging division of the Bosch Group, the company, headquartered in Waiblingen (Germany), has been offering complete solutions for the pharmaceutical and food industries for over 50 years. More than 6,100 employees at 30 locations in more than 15 countries generated a total revenue of 1.3 billion euros in 2019. The portfolio of intelligent and sustainable technologies includes stand-alone machines, as well as complete systems and services. Fields of application in the pharmaceutical industry are the production, processing, filling, inspection and packaging of liquid and solid pharmaceuticals (e.g. syringes and capsules). In the food industry, the portfolio includes process technology for confectionery as well as packaging solutions for dry foods (e.g. bars, bakery products and coffee), frozen foods and dairy products. www.syntegon.com
