Packaging biopharmaceuticals

Webinar to show solutions from Faller Packaging and partner Schubert-Pharma

How can biopharmaceuticals be packaged safely and economically? Faller Packaging will answer these and other questions together with its partner Schubert-Pharma in the webinars which will be held in November and December. During the compact online events, participants will learn how they can produce biopharmaceuticals with the right packaging safely, efficiently and in the highest quality throughout the entire product life cycle.

Even as early as the approval stage for a drug, pharmaceutical manufacturers must provide packaging that meets all the requirements typical of the industry – and when the market launch is looming, every day counts because the sooner a product is available everywhere, the faster the high costs of its development will be recouped, and the sooner patients will benefit from it. However, the production of pharmaceuticals must be rapidly adapted to the increasing demand.

If manually loaded packaging is sufficient for approval at the outset, a solution that can be automated is nevertheless required as quickly as possible after a successful launch – but many months can pass before machine-ready packaging is re-approved and a suitable plant can start operating. On the other hand, manufacturers who build up a high production capacity before the product is launched bear a major investment risk.

In their online seminar entitled "Packaging Biopharmaceuticals", which lasts for approximately 60 minutes, the packaging specialists explain how pharmaceutical manufacturers can minimise their risks and benefit from the Seamless Packaging Service of Faller Packaging and Schubert-Pharma. The German and English webinars are aimed at decision-makers in the pharmaceutical and healthcare industries.

Speakers will present pharmaceutical trends and their impact on pharma packaging, enlarge upon the challenges involved in packaging development, showcase the synergies of the Faller and Schubert collaboration and explain the Seamless Packaging Service for biopharmaceuticals.

About Faller Packaging

For more than 30 years, Faller Packaging has specialised in tailor-made, full-range solutions for secondary packaging materials for the pharmaceutical industry. The company is a single-source supplier that develops and manufactures folding cartons, package inserts, labels and combination products and delivers both standard products and special solutions based on customers' wishes. Digitalised, optimally harmonised processes ensure maximum efficiency, sustainable production and fast, reliable delivery times. In addition, Faller offers customised logistics services and supply chain concepts. As a result, the company is an expert partner for everything relating to the procurement and packaging of pharmaceutical and healthcare products.

In addition to its headquarters in Waldkirch in the German state of Baden-Wuerttemberg, Faller Packaging also has sites in Binzen and Schopfheim as well as in Hvidovre in Denmark, Łódź in Poland and Debrecen in Hungary. The Worms-based subsidiary PackEx, which was founded in 2018, specialises in the manufacture of folding cartons in small and very small batches. In total, August Faller GmbH & Co. KG has more than 1,400 employees.
