

PrePackaging Service

Pre-assembled pharmaceutical packaging

Flexible. Scalable. Designed for the transition from manual processes to automated packaging.

Scalable for automation

Packaging is developed so that it can later be automated without any design changes.

Focus on core business

We take care of pre-assembled packaging steps as required.

Higher OEE

Fewer set-up changes and more stable processes on your lines.

Focus on long runs

Small print runs and special jobs no longer tie up line capacity.

Combinable: Folding carton, Leaflet and Label.
Pre-assembled as a ready-to-pack solution.

Faller
PACKAGING

Our PrePackaging modules

- **Folding cartons:** Develop, produce, assemble, special adhesives
- **Leaflets:** Develop, produce, bundle (e.g. multiple leaflets), integrate into folding cartons
- **Labels:** Develop, produce and apply to folding cartons or leaflets

When does PrePackaging make sense?

- Small batches & high manual effort
- Launch & ramp-up with uncertain demand
- Bottlenecks due to personnel, capacity or downtime

Typical application scenarios

- New product launch / market introduction
- Clinical trials
- Peak utilisation and volatile demand
- Supply chain optimisation / fewer internal special processes
- Bridging until the new packaging plant is qualified

PrePackaging services

- Erecting
- Banding
- Bundling
- Labelling
- Manual assembling
- Display assembling
- Logistics services
- Serialisation
- Sorting
- GMP-compliant quality management system

PrePackaging Service in 4 steps

1. Clarify requirements (format, components, process goal)
2. Develop packaging (suitable for the phase and subsequent scaling)
3. Pre-assembly (Folding carton + components)
4. Deliver as ready-to-pack (for your manual and semi-automated processes)
