

PRODUCT DATA SHEET

LEPO LABEL – EASY TO OPEN, A LOT OF SPACE FOR INFORMATION

DESCRIPTION

The Faller Lepo label is multi-sided and is particularly suitable for accommodating large amounts of text and information. Thereby, the individual pages can be easily opened and closed thanks to a special zig-zag design (Leporello):

- **The label sticks** strongly to glass and plastic as well as paper and cardboard
- Suitable for all types of folding cartons, bottles, cans and wallets
- **More space for information** for instance product information, logos and pictograms
- **Static adhesion of** individual pages without the use of adhesives
- **Integration of detachable label parts** for documentation purposes, e.g. patient records
- **Print variable data** on request
- **Easy to open only** with just a single action, thanks to a new special Leporello construction

PRODUCT IMAGE

APPLICATION

- It can be applied to flat and round containers
- The Lepo label for round containers with $\varnothing > 50$ mm
- Can be applied theoretically to any relevant place
- Loosen the label at the tab, pull up to the collar and and open the second collar with further pulling
- Close by smoothing the pages down
- Removable label parts can be applied to e.g. patient records

TECHNICAL DATA

- Material: PP or PO foil
- Backing material: Glassine paper (PET for PO foil)
- Produced with 5 pages
- The 5-page Lepo label consists of three layers of adhesive material with static adhesion on the pages
- Removable label parts can be integrated (only with PP-foil)
- It is possible to include braille on the top side

PRODUCT RELATED INFORMATION

- Labels can be applied by machine or by hand
- Lepo labels made of PO-foil are suitable for mechanical labelling of round containers
- Lepo labels made of PP or PO-foil are suitable for mechanical labelling of flat containers
- Labels can always be applied using standard labelling machines

THE BENEFITS FOR YOU

- The Lepo label offers more space for information on the same area
- The answer to an acute lack of space due to e.g. the increasing requirements of multilingualism
- Label-based solution to prevent alterations to larger types of containers
- High resistance due to use of PP-foil
- Easy to open with just a single action thanks to a special gripping aid and a Leporello construction
- The static adhering pages prevent dirt from sticking and the resealability remains unchanged
- Detachable label parts for documentation purposes, e.g. patient records
- Printing of variable data
